

Concerts

Continued From Page 5

Next comes day of the show, hard work from the committee's and SA tech crew is always to be expected, it usually comes in the form of 8 a.m. to 2 a.m. the next day. What can I say, we get off on knowing we helped put it together for others to enjoy (tech crew gets paid though). On comes the band, they might be contracted to play 90 minutes and more often than not, that's what you'll get. They're all good and very professional and they're all slightly removed from what they do for a living, they have to be.

To close up this little story I'd like to ask you not to always bust the concert committee's chops, look at what's been on campus the last few years, if you think it's really been bad then I can only say one thing to you, go to another school.
